1. Exchange Module Overview

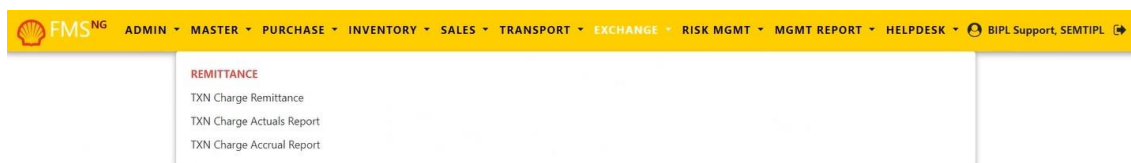

FMS^{NG} Application is an efficient ETRM System for Domestic Gas Trading, customized to meet business requirement of Shell Energy Marketing and Trading India Private Limited (SEMTIPL).

FMSNG Gas Exchange Module propose to manage IGX Transaction for Domestic Gas trading as listed below:

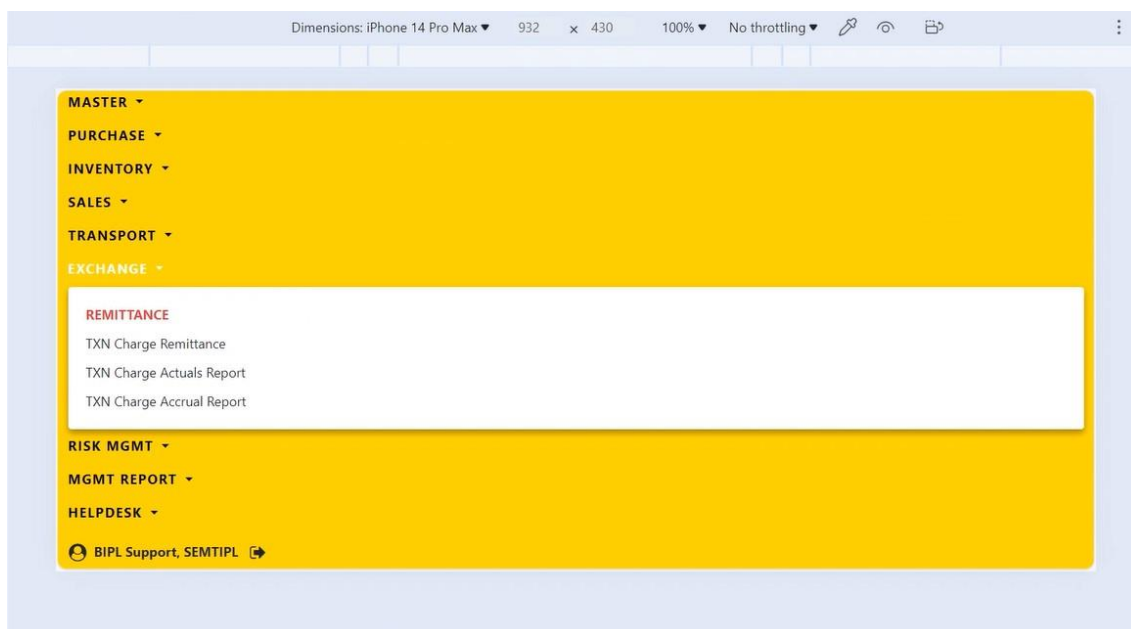

- IGX Transaction Remittance
- Interfacing with SAP P80 to flow Financial Information
- System will trigger event based emails as applicable
- Management Reports

1.1. User Interface / Screen Designs

FMS^{NG} offers Responsive UI to enable usability via any smart phone, tab and laptop of any screen size. The Menus of Exchange module are as below:

The responsive mode view over iPhone simulation:

2. Menu Network / Screen Navigation

Menus in any Module are kept under different Groups for better categorization. The Groups under Exchange Module is Remittance.

2.1. Sub Module – Remittance

2.1.1. Remittance – TXN Charge Remittance

TXN Charge Remittance Preparation is used for generating remittance for Sell and Buy both side. User can create GX free flow Remittance.

No Invoice is Generated!																

User can select “Month/Year” and “Billing Cycle” from the dropdown for which remittance will be generated.

Here User can generate remittance in two ways,

- First, go through all the process as explained in “Purchase” and “Sales” module after Creating Contract and then generate remittance.
- Second, Create Free flow remittance Using “Create New” button in this form without doing any Nomination and allocation process directly after Creating Contract.

Method 1 : Follow below steps to Generate remittance through all the Process:

1. Click on  button to Prepare remittance for which user wants to generate remittance. The popup new screen will open shown as below.

Transaction Charge Remittance Detail
