3. Report Design and Layout

3.1 Sub Module – Manual

3.1.1. Manual → User Manual

User manual provides the all necessary documents for the application to help understand it to the use.

User Manual

This document describes the Operational Functions available in FMSng Software being used at SEMTIPL. This manual provides a comprehensive operational guidance for all Menus and Modules (Forms and Reports) under each Module. It conveys end users how the FMSng Operations facilitate their day-to-day work and make it more efficient & effective.

FMSng has been developed in JAVA / JSP as a Web enabled software. It can be accessed by any client PC connected to the network, be it an Internet or over Internet. This is governed by the business rules laid down by the company regards deployment of FMSng.

On the Server side, FMS needs TOMCAT 8.0 or above to be installed and running before FMSng is loaded. Oracle 12 Software is used for storing the FMS data in the database. On the client side, running FMS Software need PC with Windows environment with EDGE web browser. No other Software is needed.

To Run FMSng Software, load Internet Explorer or EDGE web browser

Once you are connected to FMSng, a Log in Screen will appear for you to enter your Log in ID and Password.

FMSng Module/s & associated Manual/s

Sr#	Module Name	PDF	Last Updated
1	Admin		31/03/2024
2	Master		31/03/2024
3	Purchase		31/03/2024
