1. Admin Module Overview

FMS^{NG} Application is an efficient ETRM System for Domestic Gas Trading, customized to meet business requirement of Shell Energy Marketing and Trading India Private Limited (SEMTIPL).

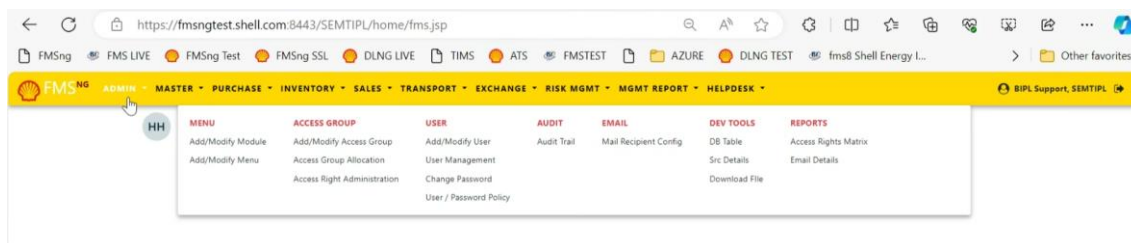

FMS^{NG} Admin Module meant to carry out all administrative activities as listed below:

- UI Module, Menu creation
- Access Group Creation and Access Right Management
- User Addition and Management
- Password Management
- Email Support for System Status Reporting
- Debug Tools
- Management Reports and Audit Trails

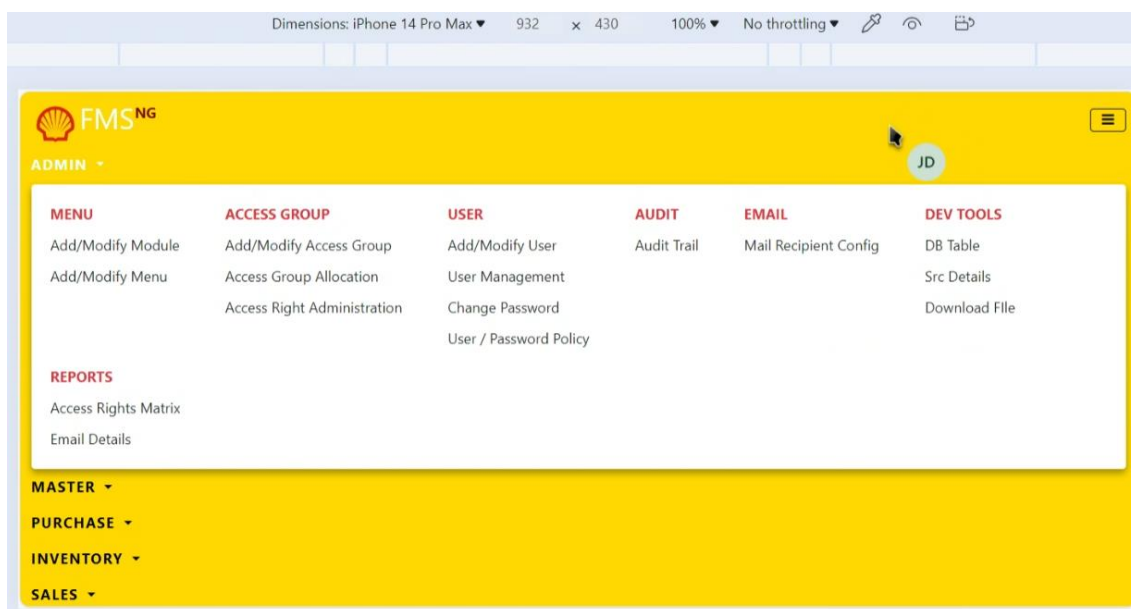

The Admin Module is more relevant for System Administrators.

1.1. User Interface / Screen Designs

FMS^{NG} offers Responsive UI to enable usability via any smart phone, tab and laptop of any screen size. The Menus of Admin module are as below:

The responsive mode view over iPhone simulation:

2. Menu Network / Screen Navigation

Menus in any Module are kept under different Groups for better categorization. The Groups under Admin Module are Menu, Access Group, Users, Audit, Emails, Dev Tools and Reports.

2.1. Sub Module – Menu

‘Menu’ contains FORMs for exposing different Modules and Menus in the application.

2.1.1. Menu – Add/Modify Module

Modules in FMS^{NG} Application added/edited from this FORM by system Administrator.

Add/Modify Module

Press Ok. The status of menu insertion in system get displayed on the top of the screen.

Note: If there is no Access right given for any menu / all menu in a module, the menu will not appear in Menu bar for user associated with those Access group.

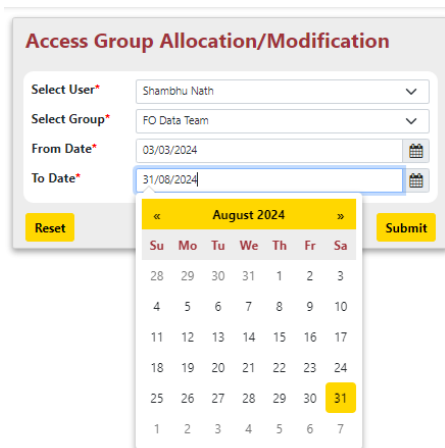

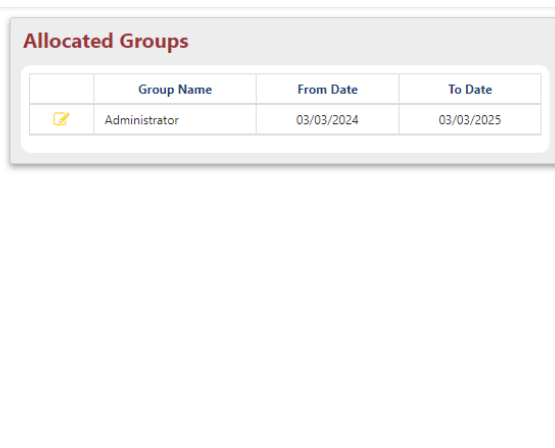

2.2.3. Access Group – Access Group Allocation

Access Group Allocation is all about associating Access Groups with Users of FMS^{NG} to perform their assigned activities. Again System Admin can only add/alter Access Group association for any User in FMS^{NG} Application.

Follow below steps to associate Access Group to FMS^{NG} User:

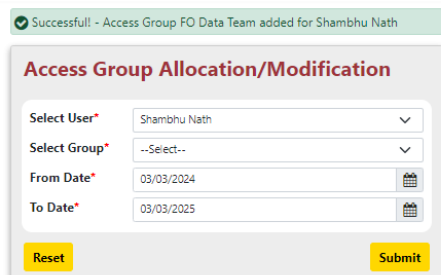

1. Select User: Select User for whom Access Group to be added
2. Select Group: Select Access Group for association.
3. From Date & To Date: Specify the during for which the association will be valid

After inserting all the details, click on “Submit” Button. A dialogue box asking your permission to associate the Access Group with User in system appears.

Press Ok. The status of insertion in system get displayed on the top of the screen.

The Right Screen displays the newly Associated Access Group detail for the User.

To edit details of any allocated Access Group of any User, follow below steps:

1. Pen/Edit the allocated access group you want from the list.
2. This will populate left pen with current data

Access Group Allocation/Modification

Select User*

Select Group*

From Date*

Expiry Reminder days*

7

Reset
Submit

- Effective Date: Effective Date from which defined parameters will be applied by the System.

User Policy:

- User ID Length: Minimum and Maximum Length of characters allowed for User ID.
- Dormant Tolerance Days: System will make any user Dormant if no activity detected from the user for defined 'Dormant Tolerance Days'.
- Max Administrators: Maximum number of IT Support (Editable by Admin only)
- Max Admins: Maximum number of Super Admin (Editable by Admin only)

Password Policy:

- Password Length: Minimum and Maximum Length of characters for Password.
- Previous Passwords No Repeat Count: Number of Previous Passwords Not to Repeat
- Password Expiry Days: Number of days after which current Password will expire, and user need to set new Password to access the system.
- Expiry Reminder Days: To set a reminder prior to expiry of Password.

Note: Only System Admin/Administrator can alter the Policy Parameters in FMS^{NG}.

2.3.3. User – Change Password

All FMS^{NG} user will change the password for their access from this FORM. The Minimal Criteria for a valid password is defined in the 'Note' section of screen below:

Change Password

User ID*

Current Password*

New Password*

Confirm Password*

Note :

Password to be minimum of 8 chars long & maximum of 13 chars long.

Password should contain following CRITERIA(s):

- (1) Atleast 1 Capital Alphabet,
- (2) Atleast 1 Small Alphabet,
- (3) Atleast 1 Numeric Digit, and
- (4) Atleast 1 Special Character.

Reset
Submit

- **User ID:** User ID of user who already having access in System and logged into it to change his/her password.
- **Enter Current Password:** Current Password of the user.
- **New Password and Confirm Password:** New password and Confirm password must be same.

Click on Submit Button. A message showing “Password Changed Successfully!!!” will be displayed on entering a password that meets all system criteria.

2.3.4. User – User Management

User Management activities, like enable/disable user, recover a dormant user, password reset, etc. done by System Admin/Administrators from this FORM.

This also gives a detail report of System User with latest status (along with history) and active Access Group associated with the user.

The View is available for ‘All’ user or based on user ‘Created On’ date range.

5. Development Tools

This menu mostly used by developer to quick investigate any root cause of system with file version available there.

5.1.1. Dev Tools → DB Table

List FMSNG Database Tables

Fetch restricted data for debug purpose.

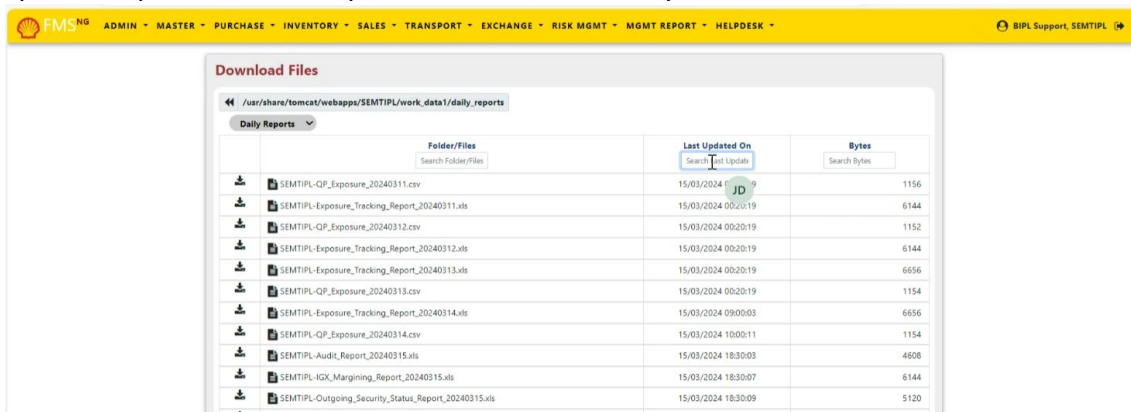

5.1.2. Dev Tools → Src Details

List FMSNG Source Files

Fetch/Upload restricted files for debug purpose.

5.1.3. Dev Tools → Download Files

Download system generated Daily reports. Sometimes User also need to download specific reports, so access provided to them case by case basis:

The screenshot displays the 'Download Files' section of the FMSNG application. The breadcrumb path is '/usr/share/tomcat/webapps/SEMTIPL/work_data1/daily_reports'. A dropdown menu is set to 'Daily Reports'. The table below lists various files with columns for Folder/Files, Last Updated On, and Bytes. A green circle highlights the 'Last Updated On' column header.

Folder/Files	Last Updated On	Bytes
SEMTIPL-QP_Exposure_20240311.csv	15/03/2024 09:00:00	1156
